

Cycle stands in Alton

The Cycle Planters were installed during the pandemic as a quick and easy solution to offer residents to cycle into town and secure their bicycle. The planters are not secured to the ground and so did not require permission from Hampshire Highways to install on pavements in the town.

Cycle Alton have been awarded a grant to install cycle hoops in the Town and have identified 7 locations where there are currently Cycle Planters. The first three photographs are locations owned by the Town Council whilst the others are the responsibility of Hampshire Highways.

Councillors are asked if they support the change from Cycle Planter to cycle hoops at the Public Gardens and Flood Meadows. Councillors are also asked if the Grounds Team can be asked to install the hoops at these sites with no charge to Cycle Alton.
